

# SPRINT REVIEW / RETROSPECTIVE

*Sprint 7*

DATE: 28/08/2018

## SPRINT DELIVERABLES

Github Status:

<https://github.com/DanWoodNZ/Glance/tree/bd5a2501cc594293b99dd8fe9d61acde6d0ced71>

SPRINT BACKLOG 2

As a user, when i'm on leave, I would like a strong visual indicator to show this

GLAN-42 

As a user, I would like to be able to login with social account

GLAN-39 

IN PROGRESS 2

As a user, I would like to choose colours to represent different clients, so they are clearly differentiated on both the week and month calendars

GLAN-53 

As a user, when I am editing I would like an visual indicator on client table such as shading

GLAN-40 

DONE 6

As a user, I would like to be able to access the calendar on the go from a cloud hosted website

✓ GLAN-52 

As a user I would like to only be able to enter letters and spaces to maintain calendar integrity and readability,

✓ GLAN-31 

As a user, I would like to be able to maintain data integrity while using the app simultaneously with other users

✓ GLAN-44 

As a registered user, I would like to be able to reset my password from the login screen, so if I forget my password I am not locked out of my account.

✓ GLAN-59

As a user, I would like a button to remove all client and consultants from my board, so I don't have to waste time deleting the one by one.

✓ GLAN-58 

As a user, I would like an visual indicator showing the day and consultant I'm currently viewing while hovering any particular calendar position.

✓ GLAN-41 

## THINGS THAT WENT WELL

We made significant progress with the overall UI for the app. This work wasn't represented in user stories, but significant work was done to make the new pages, the manage and monthly views, conform to the style established on the weekly view by our UX specialist Dan Wood.

We got feedback from client mid-sprint about the order of our user stories. He suggested that we make resetting password a priority. This user story wasn't part of the sprint planning, but by adopting agile principles we were able to change the scope mid-sprint to include the now high priority story, and also we were able to complete this story.

## THINGS THAT COULD'VE GONE BETTER

We originally planned on adding the functionality to individually colour different client on the calendar. On investigating this feature, we discovered this would be a lot more work than we originally predicted. This means we failed to complete some major user stories. As a result of this, we are allocating less major user stories overall for the following sprint, so the team can focus on completing these core features.

## LESSONS LEARNED

Gathering feedback from our client about our user stories proved really valuable, as they identified a feature we had toward the bottom of our list as something with top priority. This really enforced how important client feedback is and indicated that we should make an effort to gather feedback on proposed user stories as often as practical.
