Hi Craig,

Thank-you for putting these together for us. Tristan also forwarded the additional feedback you had for us and we will keep in mind as we develop further.

Regards,  
Dan

**Subject:** AWS account access

Hi guys,

I've added you to an AWS account, details are below. Can you guys please stick to using the Oregon (us-west-2) region under this account. I've ask the other AUT team use an different region too; that way the two teams should be less likely to interfere with each other's work.

url: <https://661561244152.signin.aws.amazon.com/console>

name: Tristan Kells

usr: mjc7321@autuni.ac.nz

pwd: PWD TO BE MAILED SEPARATELY

url: <https://661561244152.signin.aws.amazon.com/console>

name: Junha Yu

usr: nbj3293@autuni.ac.nz

pwd: PWD TO BE MAILED SEPARATELY

url: <https://661561244152.signin.aws.amazon.com/console>

usr: zhv4465@autuni.ac.nz

pwd: PWD TO BE MAILED SEPARATELY

Important:

- You will have to change your password on first log in.
- You must enable MFA, log out and then log back in before you have permissions to create/modify resources. I recommend "authy" as your virtual MFA (<https://authy.com/>).
- Where possible, use the free tier options.

- When possible, remember to stop your EC2/RDS instances to save cost (even if you spin up resources in the free tier – that way you save free credits).

- We will get an automated billing alert if costs start to build up in any given month.

Your group initially has the following full access permissions:

- RDS
- EC2
- EFS
- Lambda
- Autoscaling
- S3
- CloudWatch
- VPC

... let me know if you need other permissions or help with anything.

Regards,

Craig.
