

SPRINT PLANNING

SPRINT 4

DATE: 28/05/2018

SPRINT GOALS (*What is the MVP once the backlog is completed?*)

- **By the end of Sprint 4, the** user of the application will have to ability to store new clients. (Stored in database/text file)
- **By the end of Sprint 4, a** user of the application will have to ability to store new consultants. (Stored in database/text file)
- **By the end of Sprint 4,** the application will display previously stored information (Retrieved from database/text file)
- **By the end of Sprint 4,** the application will allow users to remove client and consultants (removed from a text file/database)
- **By the end of Sprint 4,** the application will allow users to save consultant allocations (Retrieved from database/text file).
- **Minimum Viable Product of Sprint 4,** a locally hosted web page that is capable of storing and retrieving information entered about clients, consultants and work allocations. Does not need to be hosted online.

WORK ASSIGNMENT

- Dan
 - UI/UX CSS code to increase make the project more presentable to the clients.
- Junha
 - Will work on implementing a feature allowing users to attach client information to consultants.

- Tristan
 - Add integration to a locally hosted database so that data persist over browser history.
