

DEFINITION OF DONE

Bulletproof Weekly Planner Application

Last Revised Date	Version	Authors	Notes
22/03/2018	1.0	Wood, Kells	First version
06/05/2018	1.1	Wood	Updated user stories

USER STORIES

1. The code is sufficiently commented and easy to read - (at minimum functions are commented)
2. The code has passed all tests (at least one test input for each function)
3. All tests and the code has been reviewed by another team member
4. The code has passed required acceptance tests
5. The non-functional requirements have been met
6. The product owner (Dan) signs off on the user story
7. The code for the user story has been completed and pushed to the git for version control
8. DONE

SPRINT

1. All user stories have met the definition of done (DOD) and have been moved to the completed section
2. All testing has been completed
3. The product backlog has been pruned/updated
4. The code is free of bugs
5. The product owner accepts the deliverables
6. The project has been tested on a live website
7. The team has completed a sprint review/retrospective
8. DONE

RELEASE

1. All sprints have been completed to meet the DOD.
2. The production environment is prepared for release
3. All tests have passed
4. All team members have signed off on the product release (developers, product owner and scrum master)

5. The product has been deployed to a live environment for client use
6. The client is happy and signs off on the project.
7. DONE
