

# SPRINT REVIEW / RETROSPECTIVE

*Sprint 2*

DATE: 14/05/2018

## SPRINT DELIVERABLES

GitHub Status:

<https://github.com/DanWoodNZ/Glance/tree/c999fe62c12b4fa76587d5b3927a8ee7b65768d3>

The screenshot shows a web browser window with multiple tabs. The active tab is 'Glance', which displays the application's interface. The interface includes a large 'glance' logo, a 'Consultant table' with a calendar for May, and a 'Client Table'.

**Consultant table**

Consultant	14 MON	15 TUE	16 WED	17 THU	18 FRI	
Test	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Remove"/>
Test	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Remove"/>
Test	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Remove"/>
Test	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="button" value="Remove"/>

**Client Table**

Client	Team Members	
Aut		<input type="button" value="Remove"/>
Bulletproof		<input type="button" value="Remove"/>
Test		<input type="button" value="Remove"/>
Test		<input type="button" value="Remove"/>

The bottom of the screenshot shows a Windows taskbar with various application icons and a system clock indicating 3:18 PM on 16/05/2018.

Glance Sprint 1 BETA

Have a working website, with a calendar view of consultant work, editable by all, with a client table.

0 days remaining [Complete sprint](#)

GROUP BY: None

SPRINT BACKLOG 2

- As a team member I want to add new clients to my calendar. GLAN-2
- As a team member, I would like to be able to edit my work allocation for the day. GLAN-10

IN PROGRESS 4

- As a user, I would like to select clients from a drop down table for the consultant calendar. GLAN-19
- As a user, I would like to be able to edit consultant information. GLAN-18
- As a user I would like to view a calendar detailing work being done by team members. GLAN-17
- As a team lead I want to be able to add new team members to a new calendar. GLAN-1

Create sprint

- As a user I would like a login view when first navigating to the Glance website. GLAN-5
- As a user I would like to have drag and drop functionality when adding a client to my calendar. GLAN-3
- As a user I would like to have a drop down menu when selecting a cell to add a new client. GLAN-13
- As a user, I want to be able to view a client table with relevant information about clients being worked for. GLAN-8
- As an admin I would like the option to create new clients with relevant information to be used in the calendar view. GLAN-12
- As a user I would like a welcome view displaying my current calendars or the option to create a new calendar after the login process. GLAN-6
- As a user I would like my calendar to be accessible via my mobile device. GLAN-9
- As an admin I would like to restrict access of calendar rows to members who do not need access to them. GLAN-11
- As a user I would like my role description to be displayed below my name. GLAN-14
- As a user I would like the option to display my real name, nickname or both. GLAN-15
- As a user I would like to be able to edit my account information (name, nickname, role, email and password). GLAN-16

## THINGS THAT WENT WELL

The team was able to work collaboratively to create a product backlog inside Jira. We have started development work on the project and have interface outline currently in the in our shared GitHub. Following our sprint 2 plan, we almost successfully completed all planned actions.

## THINGS THAT COULD'VE GONE BETTER

Communication with the client could have been better, we had several conversations that went on too long and should have been handled faster on both ends.

We have not all submitted work to the team GitHub yet. Instead, all members of the team have worked on individual components and have yet to integrate into a cohesive code base. This makes it hard to keep track of the work already completed on the project. Will need to ensure we are all working on a group repository for the next sprint.

## LESSONS LEARNED

Early communication with client to establish a firm understanding of the product to be delivered. We spent too long going back and forth on the platform for the product to be built upon, between a standalone web application or a Jira integrated application. We could have saved a lot of research time if we had

confirmed which core features were essential, such as the application being mobile device friendly vs Jira integration.com.
