MEETING MINUTES

Client Meeting

LOCATION: Bulletproof Office

DATE: 24/07/2018

TIME: 1:00 - 2:00

ATTENDEES: Craig, Tristan, Dan, Junha

Agenda Items

- Showed the client the current application to gather together front-end feedback
- Asked the Craig about how to setup the application in AWS. Craig advised the appropriate virtual security setting groups required to connect the database instance to the elastic beanstalk instance.
- Application Feedback
  - When a new consultant is allocated to a client, a unnecessary comma is inserted.
  - The colours have not been made colour blind friendly.
  - Alternative row should have different shading/colouring
  - Should be confirmation on deleting table data.
  - The leave option should made more prominent
  - The client abbreviation should be editable.
  - The page should not send the default browser alerts
  - Need to check that multiple users can use the board at the same time.
  - No need for the N/A option as the default is AT THE OFFICE
  - Login should support facebook/google logins

- Add an add client page to the applications, removing the functionality from either weekly or month calendar
- Could implement consultant board subheading to represent different offices.
- Alphabetical order for consultant and client tables as the default.
- Add an mouse change to indicate when an element is draggable.
- Don't need a welcome screen or access to multiple boards.

- Agreed to have a meeting with Bulletproof team in two weeks to give update on progress of the application (13:00 07/08/2018)
