Agenda Items

- Completed sprint retrospective/review for sprint 7.
- Completed a sprint planning for sprint 8
- Decided to focus on implementing the coloured client allocations and office-status icons for the next, as previous changes to UI have made core features non-functional for the weekly calendar.
- Discussed usability features, such as being to use Enter to log in, register and create client/consultants
- Agreed as a team to spend the last sprint of the semester doing extensive bug and performance testing. Agreed to investigate testing techniques before this sprint so we can smoothly implement this process.
